

Chart 1: Electricity Total Sales Index (2010 = 100)

- The **Electricity Sales Composite Index (ESeCI)** that consists of domestic and export sales for March 2019 stood at 155.8 basis points compared to 149.7 basis points in February 2019. This represents an increase of 4.1 percent m/m and a decline of 1.8 percent y/y.
- The **domestic sales sub-index** recorded 155.9 basis points in March 2019 compared to 149.5 basis points recorded in February 2019 (Chart 2). This shows an increase of 4.3 percent m/m and a decrease of 2.2 percent y/y.

Chart 2: Electricity Sales Subsectors Index (2010 = 100)

- The **export sales sub-index** stood at 153.0 basis points in March 2019 compared to 156.3 basis points recorded in February 2019. This represents a decline of 2.1 percent m/m and an increase of 14.9 percent y/y.
- A **total** of 338 207 MWh of electricity was sold in the domestic economy during March 2019, whereas only 10 125 MWh was exported during the same period.

Chart 3: Electricity Total Sources Index (2010 = 100)

- The **Electricity Sources Composite Index (ESoCI)** that consists of own generated and import sources stood at 122.1 basis points in March 2019 compared to 116.7 basis points recorded for the previous month. This represents an increase of 4.6 percent m/m and a decline of 6.2 percent y/y.
- The **own generation** sub-index elevated, recording 143.4 basis points in March 2019 compared to 109.5 basis points registered for February 2019 (Chart 4). This represents an increase of 30.9 percent m/m and a decline of 24.7 percent y/y.

The decrease on y/y is attributed to the slowdown in the generation of electricity mainly obtained from the Ruacana, and Momentous One Solar IPP Power Station.

Chart 4: Electricity Sources Subsectors Index (2010 = 100)

- The **import sub-index** recorded 110.4 basis points in March 2019 compared to 120.6 basis points recorded in February 2019. This represents a decrease of 8.5 percent m/m and an increase of 13.6 percent y/y.
- The increase over the year in electricity imports was mainly due to the increase of the electricity imported from Eskom Aggeneis Power Stations.
- A **total** of 161 498 MWh of electricity was produced in Namibia during March 2019 while 227 721 MWh were imported during the same period.
