Methodology

Data Sources: The data are obtained from the Meat Board of Namibia and the Agricultural Union of Namibia

Base year: Livestock sectoral report is harmonised with the Quarterly and annual national accounts base year 2010.

Calculations of index: The index is calculated based on the 2010 base year volumes and 2010 weights. The index is a magnitude of the volume changes over time, with reference to the volume of the base year 2010. Index is calculated as a ratio of a volume of a specific component in a specific month to the total volume of that component in 2010.
