

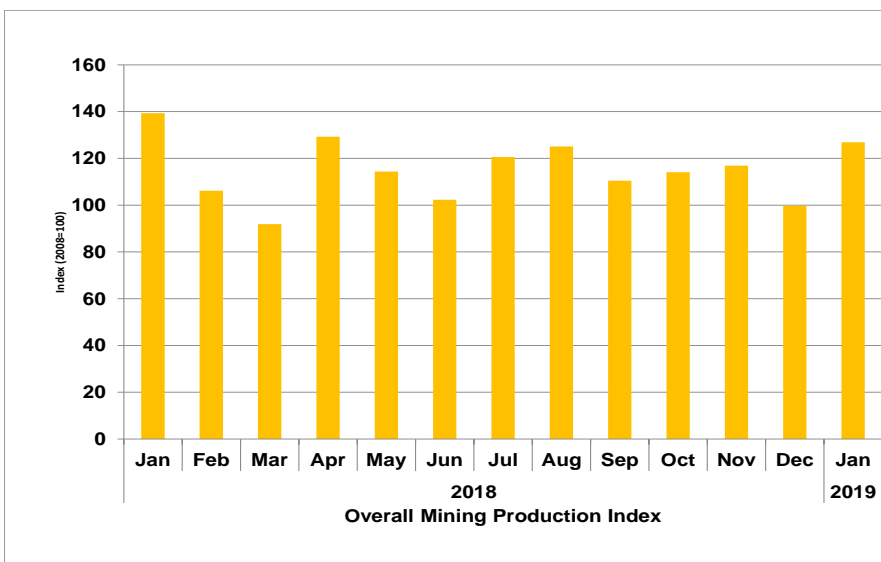

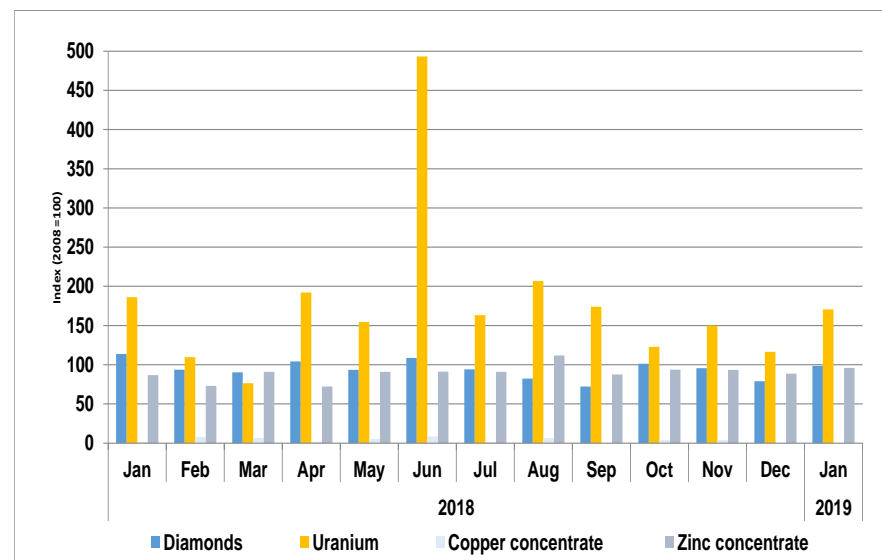

Chart 1: Overall Mining Production Index

- **The mining composite index** recorded 126.9 basis points in January 2019 compared to 99.7 basis points registered in December 2018. This represents an upsurge of 27.2 percent m/m and a decline of 9.0 percent y/y (Chart 1).
- **The diamond production index** for January 2019 stood at 98.6 basis points compared to 79.0 basis points recorded in the preceding month. This is an inclination of 24.8 percent m/m and a drop of 13.2 percent y/y (Chart2).
- **Uranium production index** posted 170.7 basis points in January 2019 compared to 116.4 basis points registered in December 2018. This represents an increase of 46.5 percent m/m and a decline of 8.3 percent y/y.

Chart 2: Production Indices of Selected Minerals

- **There was no production of copper concentrate since December 2017 up to date but the infrastructure at the site is kept at operational level to await favourable economic conditions (care maintenance).**
- **Zinc production index** recorded 96.0 basis points in January 2019 compared to 88.5 basis points registered in December 2018. Showing increases of 8.5 percent m/m and 10.9 percent y/y (Chart 2).

Chart 3: Production Index for Gold Bullion

- Chart 3 above presents the index for Gold Bullion. The index for January 2019 stood at 350.7 basis points compared to 338.3 basis points recorded in the preceding month. This represents a rise of 3.7 percent m/m and a drop of 9.0 percent y/y.

TABLE 1: Mining Composite Index of the Selected Minerals

		Diamonds	Uranium	Copper concentrate	Zinc concentrate	Gold Bullion	Index
2010	Jan	58.8	174.4	0.0	94.4	112.4	95.5

- **Diamond:** Is a very hard mineral that is a form of bars of carbon and is used especially in Jewellery.
- **Gold Bullion:** Is a gold or silver in bulk before coining or valued by weight which basically means gold bullion is gold valued purify and weights.
- **Zinc:** Is a metallic element with blue- white colour used as a protective covering for iron and to make metal alloys like nickel silver.
- **Uranium:** Is a Silver heavy radioactive polyvalent metallic element that is found especially in uraninite and exists naturally as a mixture of mostly no fissionable elements.

Methodology notes and data sources

Data Sources: Ministry of Mines and Energy is the sources of monthly sectoral data.

Note: The data collected for monthly sectoral reports are for selected minerals, namely: Diamond, uranium, copper, Zinc and Gold.

Base year of monthly mining index: 2008
