

//KARAS

POPULATION PROJECTIONS FOR SELECTED YEARS

MISSION STATEMENT

“In a coordinated manner produce and disseminate relevant, quality and timely statistics that are fit-for-purpose in accordance with international standards and best practice”

VISION STATEMENT

“Be a high performance institution in statistics delivery”

CORE VALUES

Performance

Integrity

Service focus

Transparency

Accuracy

Partnership

FOREWORD

Information about future population is an important prerequisite for any objective and realistic development plan. Population projections provide information on the total population, age and sex structure of the future population of a country. Such information is essential for the formulation of national development programmes, as well as monitoring and evaluating the implementation of all development plans and programs at national and regional levels.

These tables forms part of the population projection report, as not all tables were presented in the projection report. The information presented herein is on total population for selected year's i.e. 2014, 2015, 2016, 2017, 2018 and 2030. Thus, tables for other years not provided herein as well as in the population projection report will be made available to users on request. The tables presented herein are for "Medium" variant. The Medium variant assumes that the population has a normal growth rate. We are hopeful that users will find the information useful for decision making and planning purposes.
